Help tell the story of Puerto Rico's hurricane recovery efforts in El Yunque National Forest

Project Title	Help tell the story of Puerto Rico's hurricane recovery efforts in El Yunque National Forest
Project Summary	Recovering from the devastating impacts of hurricanes Irma and Maria in September 2017, El Yunque National Forest in Puerto Rico is updating and organizing photo and video resources and developing communication products to help tell the story of on-going recovery and resource management efforts.
Country	United States
Country/Region of Focus	United States

Project Description

The focus of this project is to prepare a photo filing system of images, based on agency standards, for El Yunque National Forest and agency-wide use, as well as for the Forest's Flickr site for external sharing. Available video resources can also be catalogued using agency standards. After an inventory of photos/video is prepared, make suggestions on additional photo/video needs and research other suggested resources available for agency use. Help select quality images to be enhanced and used as iconic photos in various digital projects. If selected participant is located in Puerto Rico, they can assist with taking photos and videos for media collections. Graphic design and writing skills are also needed to then develop integrated communication products with key conservation messages and thematic design elements for templates, flyers, signs, infographics and other visual tools to be used in presentations, events, exhibits, and digital media (social media, website and apps).
